

# CHANDRA SEKHAR REDDY BUDDALA

[bcsr11223@gmail.com](mailto:bcsr11223@gmail.com) | +44 7407 433 711 | [linkedin.com/in/csr-chandra-sekhar-reddy](https://www.linkedin.com/in/csr-chandra-sekhar-reddy) | United Kingdom

---

## PROFESSIONAL SUMMARY

Senior Data Analyst with 5+ years of experience delivering BI dashboards and decision-ready analytics across commercial, operational and project environments. Advanced in Power BI, Tableau, SQL, Excel, Microsoft Azure, Snowflake, Databricks and Python/Pandas, with hands-on experience analysing large structured and unstructured datasets, building semantic models and automating reporting. Strong in data quality, governance and GDPR-aware data handling, translating stakeholder questions into KPI frameworks, identifying trends, patterns and anomalies, and presenting actionable insights to technical and non-technical teams.

## RELEVANT SKILLS

**BI & Visualisation:** Power BI | Tableau | DAX | Power BI semantic models | Dashboard development | KPI design & reporting | Data visualisation

**Data Analysis & Programming:** SQL | Python/Pandas | Advanced Excel | Structured & Unstructured data analysis | Trend & variance analysis | Anomaly investigation | Large dataset analysis

**Cloud & Data Platforms:** Microsoft Azure | Snowflake | Databricks | PostgreSQL | Amazon Redshift | AWS-hosted data | dbt

**Data Preparation & Modelling:** Power Query | ETL | Dimensional modelling | Data cleansing & standardisation | Data transformation | multi-source data integration

**Data Quality, Governance & Delivery:** Data profiling | Source-to-report reconciliation | Data quality & governance controls | GDPR & data protection | UAT | Reporting automation | Requirements gathering | Stakeholder engagement | Continuous improvement

## WORK EXPERIENCE

**Senior Data Analyst - Retail Sales Analytics** | *May 2025 - Present*

**Sainsbury's, United Kingdom**

- Designed and developed interactive Tableau dashboards tracking 10+ commercial KPIs, including Total Sales, Revenue, Total Profit, Profit Margin, Sales Growth, Profit Growth, Items Sold, Average Sales, Minimum Sales and Maximum Sales, enabling product, category and period-level performance monitoring.
- Engineered analysis-ready datasets in Microsoft Azure using SQL joins, CTEs, aggregations and reusable transformation logic across transactional, product, category and calendar data.
- Built monthly and weekend trading analysis with Tableau calculated fields for sales growth, profit growth, profit margin and period-on-period variance, helping stakeholders identify peak periods and product/category drivers behind performance changes.
- Analysed structured transactional and unstructured operational data using Python/Pandas, Power Query and Excel, standardising free-text fields and resolving nulls, duplicates, inconsistent formats and data-type issues before dashboard refresh and publication.
- Automated recurring SQL, Python/Pandas, Power Query, Excel and Tableau workflows, reducing manual reporting effort by approximately 40% and saving around 2 hours per reporting cycle.
- Maintained data quality and governance standards through validation checks, documented KPI logic and GDPR/data-protection controls, supporting UAT and ensuring analytical outputs were accurate, consistent and handled appropriately for business decision-making.

**Data Analyst - Advanced Analytics (MSc Placement)** | *Aug 2024 - May 2025*

**Banana Apps, England, UK**

- Led analytics delivery for a Minerals & Resources project, defining KPI logic and preparing, cleansing and blending large, complex multi-source datasets using SQL, Power Query, Python/Pandas and Excel; reconciled totals and investigated anomalies.
- Built 4 interactive Power BI dashboards and complementary Tableau visualizations for KPI reporting project-performance monitoring, trend analysis and exception management; applied data-modelling principles and Advanced Excel to validate measures and reporting logic.
- Analysed trends, variance and exceptions across project KPIs, traced outliers back to source records and transformation logic, and translated findings into actionable insights and operational improvements for project stakeholders.
- Standardised metric definitions, validation checks and reporting documentation to strengthen data quality, accuracy, consistency and governance, improving auditability across recurring project reporting cycles.
- Automated repeatable data-preparation, validation and reporting steps, reducing manual reporting effort by 30%; led stakeholder walkthroughs and UAT and refined dashboard outputs from user feedback.

## **Business Intelligence Developer (Contract) | Oct 2023 - Aug 2024**

### **Your Knowledge Buddy (YKB), UK**

- Designed and developed interactive Power BI dashboards tracking 8+ KPIs across bookings, service demand, customer engagement and conversion performance, giving stakeholders a consolidated view of operational and business trends.
- Built scalable Power BI semantic models using star-schema and dimensional-modelling principles, creating fact/dimension relationships, hierarchies and reusable DAX measures for consistent KPI reporting.
- Engineered analysis-ready datasets using Snowflake, Databricks and SQL, applying CTEs, joins, aggregations and transformation logic across customer, booking, service and engagement data.
- Built ETL and data-preparation workflows using Python/Pandas, SQL and Power Query, cleansing nulls, duplicates and inconsistent records to improve downstream Power BI data quality and reliability.

## **Data Analyst - Advanced Analytics | Mar 2022 - Sep 2023**

### **Expleo Group, Chennai, India**

- Partnered with client project teams, business leads and technical specialists to define KPIs, reporting requirements and analytical priorities across enterprise BI engagements.
- Integrated large, complex structured datasets using advanced SQL and Python across Snowflake, PostgreSQL and AWS-hosted data to produce management information, identify trends and patterns, and support decision-making.
- Designed reusable semantic/dimensional structures and built Tableau dashboards from SQL extraction through data modelling and visualisation, presenting trends, data limitations and recommendations clearly to technical and non-technical audiences.
- Traced data discrepancies through source data, dbt/SQL transformations and KPI logic, documented definitions and agreed corrective actions; coached 2 junior analysts on SQL, visualisation and quality checks.

## **Junior Data Analyst | Jun 2021 - Mar 2022**

### **Expleo Group, Chennai, India**

- Validated and reconciled 925 enterprise datasets across 7 banking domains in a major migration using SQL and Amazon Redshift, identifying source-to-target discrepancies before downstream reporting.
- Investigated structural and data-quality failures by tracing issues through source data and transformation logic and maintaining clear validation evidence for defect resolution.
- Worked with Business Analysts, Data Engineers, Developers, DBAs and QA to investigate root causes, test fixes and own issues through resolution, contributing to zero post-migration defects across the datasets in scope.

## **EDUCATION**

---

### **MSc Data Science | Oct 2023 - Jan 2026**

#### **University of Hertfordshire, Hatfield, UK**

- Dissertation: Analysed 123,000 job-posting records to identify labour-market trends, anomalies and data-quality issues, producing decision-ready findings from a large real-world dataset.

### **B. Tech Mechanical Engineering | 2015 - 2019**

#### **Jawaharlal Nehru Technological University Anantapur (JNTUA), India | First Class**
